

# CONTEMPORARY ART CURATOR

## ARTIST DIRECTORY

## Marion Hoepflinger

September 17, 2020

Marion C. Hoepflinger is an artist from Salzburg, Austria. After working for several years in the field of basic molecular biology research, she developed her artistic skills since 2013 and remained under the tutelage of Russian as well as Austrian artists. Marion creates mixed media paintings in a graphical style, using different media (mainly watercolours, liquid acrylics, oils, artist coloured pencils and markers) and works with lithographic techniques on paper and canvas.

### *Artist Statement*

Marion is searching for perception, effect and truth. The female position is hers to look at the world, thus she is placing it intentionally in the focus of her work: How is a (female) human being interacting with the world, with other people, with nature? How is she leaving an impression on others and how is she really feeling while acting her role?

### *Exhibitions, Publications*
